EDUCATION

- **National Institute of Technology, Warangal** 2025–2027
Master of Technology in Computer Science and Engineering CGPA/Percentage: 8.40
- **Lovely Professional University** 2018–2022
Bachelor of Technology in Computer Science and Engineering CGPA/Percentage: 7.47

EXPERIENCE

- **DXC Technology** Jun 2022 - Dec 2023
Associate Professional Software Engineer (Joined) – Analyst II Software Engineering (Resigned) INDORE
 - Contributed to software development and engineering tasks, gaining hands-on experience in various technologies and methodologies.
 - Progressed to Analyst II Software Engineering role, focusing on system analysis, troubleshooting, and optimizing software solutions.

PERSONAL PROJECTS

- **ContextDec: LLM-Based Context-Aware Decision System for Autonomous Vehicles** 2026
Context-aware autonomous driving framework using Large Language Models and temporal memory.
 - Programming Language: Python
 - Built a real-time AV simulation pipeline using the nuScenes dataset and Ollama-based Gemma 3.
 - Integrated temporal memory to incorporate historical vehicle states into decision making.
 - Implemented decision and query modes to provide driving actions and explainable responses.
- **Fair Topic Allotment System** 2026
Web-based system for fair allocation of project topics to students.
 - Developed a full-stack application using MongoDB, Express.js, React, and Node.js (MERN stack).
 - Implemented the Stable Marriage Algorithm to match students with topics based on preferences.
 - Ensured fair and conflict-free allocation of topics among students.
- **Improved Max–Min Task Scheduling Algorithm** 2025
Adaptive extension of Max–Min scheduling for cloud task allocation and load balancing.
 - Programming Language: Python
 - Domain Concepts: Cloud Computing, Task Scheduling, Load Balancing, Performance Optimization
 - Implemented Improved Max–Min and an adaptive load-aware variant to distribute tasks across virtual machines.
 - Evaluated scheduling performance by comparing makespan and workload distribution across VMs.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, C++, Java
Developer Tools: Tomcat, Android studio
Frameworks: Angular
Cloud/Databases: Google Cloud Platform, Mysql, Oracle
Soft Skills: Time Management, Critical Thinking, Communication Skills
Coursework: Object-oriented Design, Algorithms Design, Data Structures, Relational, Databases
Areas of Interest: Computer Networks

ACHIEVEMENTS

- Ranked **1603 among over 170825 candidates in GATE 2025 (Computer Science)**, placing in the **top 1% nationwide**.
- Recognized twice as '**Employee of the Month**' and awarded '**Rising Star of the Quarter**' for outstanding performance.
- **Data Structures & Algorithms Certification** – GeeksforGeeks (Self-paced).
- Ranked 15th in **Code Paradox Programming Contest**.
